

## SettSoftware Services

At SettSoftware, we know that the way to get the best deal is by shopping around.

However, shopping around costs time and money. In addition, having multiple suppliers for a single group of products is hard work. Not only must you manage several purchasing relationships, but you must also manage the coordination of the suppliers. Why can't one supplier give the best deal consistently over a range of products and services??? At Sett Software we do just that. To make your life easier:

- We have a simple pricing structure, giving competitive hourly rates across our range of services.
- We have expanded our range of services as a result of customer feedback, to meet all our customers' needs.
- We are a 'can do' organisation who will try to accommodate all client requests. If you require a service we do not advertise, please ask.
- Our services are seamlessly integrated, meaning that employing our talented professionals on numerous projects is as straightforward as a single project.
- We have a great deal of experience in working with other organisations and managing work undertaken by other organisations. Where required, we can manage or work as partners with your existing suppliers. Sett Software's competitive range of services will ensure you get exactly what you want, at an affordable price.
